900 Fourth Street SE
Pine City, MN 55063

This document is available in alternative formats to individuals with disabilities by calling 800.521.7463 or (TTY) 320.629.1030. Pine Technical & Community College is an affirmative action, equal opportunity employer and educator.
Seven hours of contractor continuing education is provided with focus on several key areas shown to be of particular interest over the last 12 months.

Summary: The most common source of building failure is water intrusion. Fortunately it can be effectively minimized through integration of exterior materials. We will examine code and manufactures' installation criteria for roofing, wall cladding and flashing details. Time will also be spent exploring several new innovations in building materials and processes. One hour of education on the Minnesota Energy Code is also included as stipulated for Licensed General Contractors Continuing Education requirements.
