Activar’s Industrial Products Group (AIPG) is hiring a Tube Bender for our production facility in Forest Lake. We are a metal fabricator specializing in precision tube forming, bending and rolling. In addition, our expansive workshop allows for complimentary fabrication methods such as welding, finishing, drilling, laser, tapping, and sheet metal applications. This position performs tube bending set-ups and operations.

This is a full-time position offering stability, consistent day-time hours (four 10 hr. shifts) and a competitive benefits package to start (14-day paid time off, community service hours, medical, dental, vision, 401(k) match, tuition loan program, and more).

Typical work week: Monday – Thursday 6:00 am – 4:30 pm/ 3-day weekend every weekend!

Pay: $14.00 - $16.00/hr. DOQ
Location: Forest Lake, MN

PRINCIPAL ACCOUNTABILITIES:
• Perform tub bending operations per job specifications.
• Operate machines to ensure the highest quality of production is achieved.
• Accurately and efficiently complete orders to established procedures.
• Ensure compliance with all required documentation.
• Meet daily production and quality goals.
• Achieve and strive to expected run rates.
• Assist other operators as needed or directed.
• Ensure the safe operation of equipment.
• Recommend measures to improve production methods, equipment performance, and quality of product.
• Report immediately to supervisor/lead/manager any and all problems, which may affect safety, equipment, tooling, and/or quality.
• Maintain full working knowledge of all processes.
• Ensure a clean and organized work environment.
• Conduct himself/herself in a professional manner in accordance with company guidelines.
• Other duties as assigned.

KNOWLEDGE, SKILLS, AND ABILITIES:
• Effective communication, interpersonal, and organizational skills.
• Tenacity in overcoming obstacles while maintaining productive and positive working relationships.
• Ability to execute in a rapidly changing fast paced environment that requires strong team work.
• Understanding of all tools, gages, equipment, and other various instruments used to perform position.
• Versatile in all material ranges.
• Able to design unique tooling to expand machine capabilities.
• Basic ability to understand blueprints, schematics, and instrumentation diagrams.
• Skill in performing accurate arithmetic functions involving addition, subtraction, multiplication, and division; using decimals, percentages, fractions, and ratios.

EDUCATION AND EXPERIENCE:
Required:
• One year of applicable experience in a manufacturing setting.
• Equivalent of high school diploma or G.E.D. certification.

Preferred:
• Previous tube bending experience.
• Vocational certification or degree.
• Experience following ISO procedures.
